

## Calendar Updates

*Calendar Updates*  
*March 7, 2024*

Last week, calendars were moved to a new location and gained some additional functionality.

Previously, calendar settings were found at the bottom of the **District Information** page, but now there is a specific **Building Calendars** page accessible from the **Settings** page.

Additionally, districts now have the option to add building-specific calendars. Otherwise each district will have a “Default” calendar that will apply to all buildings without their own calendar. To learn more about building-specific calendars, see the calendars support page.

### **Steps** *To update calendars:*

1. While logged in as an administrative user, navigate to **Settings > Building Calendars**.
2. Select the building you wish to update calendars for or choose to update the District Default calendar.
3. To add a calendar for a new year, under **Add A New School Year**, give the calendar a name, enter start and end dates, and click **Add**.
4. To add a break, under **Break/Day Off**, give the break a name, enter start and end dates, and click **Add**.
5. To delete an entire calendar, click the **Remove Calendar** button at the top right of the calendar. To remove a break, click the **X** next to the break line.

2023/2024 School Year			Remove Calendar
<b>School Year</b>	<b>Year Start</b>	<b>Year End</b>	
2023/2024 School Year	09/01/2023	06/07/2024	
<b>Break/Day Off</b>	<b>Start</b>	<b>End</b>	
Labor Day	09/04/2023	09/04/2023	X
	mm/dd/yyyy	mm/dd/yyyy	Add

 **Tip** When this change was put into effect, data from the existing school calendar was automatically populated into the new District Default calendar, so no manual work is needed unless you opt to add building-specific calendars.
